

In our area we listen to K-LOVE radio which comes by FM translator. We have been told that the expansion of the LPFM service that is being considered would take priority over current FM translators. We believe it would be detrimental to our community if the expansion was allowed to take place.

K-LOVE has been very helpful to me and hundreds of thousands of others around the nation with their positive and encouraging music and messages. I believe contemporary family-friendly programming of K-LOVE is necessary to the young and young at heart in our community.

Please do not force many stations broadcast by translators off the air. Please preserve the FM translator service that many of us value and depend upon.
